

Installation, Operation and Maintenance

Temporary Strainers

Installation

Install between flanges using gaskets on each flange face. For maximum efficiency, determine length of the time it takes for screen to become approximately 1/3 clogged. Remove strainers and clean screen. Replace strainer in pipeline in same position as before and replace bolts.

Spare screen will facilitate shorter “shutdown time”. Pressure gauges installed before and after strainer in line will indicate pressure loss due to clogging and may be used as a guide to determine when cleaning is required.
