A Holistic Approach to Water Conservation and Safety

Leading Rainwater Sustainability Solutions

As the industry leader in developing water sustainability solutions, Watts sets the standard for rainwater harvesting. With over 140 years of experience informing our efforts, we provide the knowledge, expertise, and product selection needed to harvest rainwater. We design and manufacture the most efficient solutions to capture the only commodity for which there is no economic alternative—water. Our team of engineers provides support at every step of the process.

- Simplified modular design process
- Pre-Engineered Rainwater Control Stations
- Compact footprint with easy servicing
- Single warranty from Watts

Green Roof Drains

- Constructed specifically for green roof applications
- Standard models accommodate most extensive or intensive green roof specifications
- Unique features and design flexibility eliminate long lead times and custom manufacturing expenses
