## MasterSeries® LF860-FS Large Reduced Pressure Zone Backflow Prevention Assemblies 2½" – 10"

FEBCO® MasterSeries® LF860-FS Large Reduced Pressure Zone Assembly is specifically designed to protect against possible backpressure and backsiphonage conditions for high hazard (that is, toxic) application in accordance with Local Governing Water Utility Code. This backflow preventer is primarily used on potable drinking water systems where Local Governing Code mandates protection from non-potable water being pumped or siphoned back into the potable water system.

The ductile iron body is fused with ArmorTek™ coating technology to resist corrosion due to microbial induced corrosion (MIC) or exposed metal substrate. The series features Lead Free construction to comply with low lead installation requirements. The Lead Free Reduced Pressure Zone Assemblies shall comply with state codes and standards, where applicable, requiring reduced lead content.

The series includes an integrated flood sensor to detect excessive water discharges from the relief valve. When activated through an add-on sensor connection kit, the flood sensor relays a signal that triggers a multichannel alert (call, email, text) to notify personnel about potential flooding. The add-on sensor connection kit is available for both building management systems, or BMS, and cellular communication. (For more information, refer to *Installation, Maintenance, and Repair Manual, Series LF860-FS and LF866-FS.*)

### Features

- Stainless steel relief valve seat and stainless steel check components for maximum performance and durability
- Inline serviceable assembly
- No special tools required for servicing
- Captured modular spring assembly
- Reversible and replaceable discs
- Field replaceable seats
- Ductile iron valve body design
- Advanced ArmorTek™ coating technology to resist corrosion of internals

\*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

FEBCO product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact FEBCO Technical Service. FEBCO reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on FEBCO products previously or subsequently sold.

LF860-FS-OSY

- Modular and repairable pressure differential relief valve
- Clapper check assembly
- Captured O-ring design
- Integrated sensor for flood detection, activated by add-on connection kit

### NOTICE

Use of the integrated flood sensor does not replicate the need to comply with all required instructions, codes, and regulations related to installation, operation, and maintenance of this product, including the need to provide proper drainage in the event of a discharge.

Watts® is not responsible for the failure of alerts due to connectivity or power issues.

### NOTICE

The information contained herein is not intended to replace the full product installation and safety information available or the experience of a trained product installer. You are required to thoroughly read all installation instructions and product safety information before beginning the installation of this product.

Inquire with governing authorities for local installation requirements.

A WATTS Brand

## Specification

FEBCO MasterSeries LF860 Reduced Pressure Zone Assembly shall be installed on the potable water supply and at each point of cross-connection to protect against possible backpressure and backsiphonage conditions for high hazard (that is, toxic) applications. The assembly shall consist of a main line valve body composed of a pressure differential relief valve located in a zone between two (2) independently acting approved clapper style check modules with replaceable seats and disc rubbers. Servicing of the pressure differential relief valve and both check modules does not require any special tools; both check modules are accessed through independently top entry covers. This assembly shall be fitted with AWWA Compliant inlet/outlet resilient seated shutoff valves; when used on a Fire-Sprinkler application, the assembly shall be fitted with UL Classified and FM Approved inlet/outlet resilient seated shutoff valves and contain four (4) properly located resilient seated test cocks as specified by AWWA Standard C511. The valve body shall utilize a coating system with built-in electrochemical corrosion inhibitor and microbial inhibitor. Flow and pressure loss performance parameters shall meet the requirements of AWWA Standard C511.

## Model Suffix

FS	Integrated sensor for flood detection
OSY	UL Classified and FM Approved OS&Y gate valves (ANSI/AWWA C515 Compliant)
NRS	Non-rising stem gate valves (ANSI/AWWA C509 Compliant)
LG	Less shutoff valves (This is NOT an APPROVED ASSEMBLY.)

## Example Ordering Descriptions

4" LF860-FS-OSY - Valve assembly fitted with flood sensor and OS&Y shutoff valves

4" LF860-FS-NRS - Valve assembly fitted with flood sensor and NRS shutoff valves

## Approvals - Standards

- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at The University of Southern California (FCCCHR-USC)
- ASSE 1013 Listed
- UL Classified\*\* (US & Canada)
- FM Approved\*\*
- IAPMO
- AWWA Standard C511 Compliant
- End Connections: Compliant to ASME B16.1 Class 125 & AWWA Class D Flange

## Assembly Flow Orientation

Horizontal (2½" – 10") - Approved by FCCCHR-USC, ASSE, cULus, FM, IAPMO, and CSA

\*\*Assembly configured with UL Classified and FM Approved OS&Y RW gate valves. Less gate valve assemblies are not UL Classified and FM Approved configurations.

## Materials

All assemblies (sizes 2½" to 10") are similar in materials and construction. Contact your local FEBCO representative if you require further information.

Main Valve Body	Ductile iron Grade 65-45-12
Relief Valve Body	Ductile iron Grade 65-45-12
Coating	Fusion epoxy coated internal and external AWWA C550
Shutoff Valves	NRS resilient wedge gate valve AWWA C509 (Standard) OSY resilient wedge gate valve AWWA C515 (UL Classified and FM Approved)
Check Seats	Stainless steel
Relief Valve Seat	Stainless steel
Disc Holder	Stainless steel
Elastomer Disc	Silicone
Spring	Stainless steel
Clamp	AWWA C606 (10" only)

## Pressure - Temperature

Max. Working Pressure	175 psi (12.1 bar)
Min. Working Pressure	20 psi (1.4 bar)
Hydrostatic Test Pressure	350 psi (24.1 bar)
Hydrostatic Safety Pressure	700 psi (48.3 bar)
Temperature Range	33°F - 140°F (0.5°C - 60°C) continuous

## Dimensions & Weights

Below are the nominal dimensions and physical weights for Series LF860-FS, sizes 2½" to 10". Allowances must be made for normal manufacturing tolerances. Download installation instructions at [watts.com](http://watts.com), or contact your local FEBCO representative for more information.

SIZE		DIMENSIONS														WEIGHT***				
	A		B		C		D		E*		F**		G		H		NRS		OSY	
in.	in.	mm	in.	mm	in.	mm	in.	mm	in.	mm	in.	mm	in.	mm	in.	mm	lb	kg	lb	kg
2½	40¾	1035	25½	648	10	254	11⅞	288	12⅝	321	16⅞	416	4½	114	7⅞	181	250	113	254	115
3	41⅞	1064	25⅞	651	10	254	11⅞	288	12⅞	327	22¼	565	4½	114	7⅞	187	276	125	280	127
4	46¼	1175	28	711	10⅞	257	11½	291	14⅞	365	23¼	591	5½	140	8⅞	206	335	152	347	157
6	56	1422	34¾	883	12¾	324	12½	316	18⅞	479	30⅞	765	6½	165	9⅞	251	503	228	523	237
8	65	1651	41¾	1061	15⅞	397	13⅞	345	23½	597	37¾	959	7	178	11⅞	283	807	366	835	379
10	72⅝	1845	46⅞	1178	15⅞	397	13¾	348	27½	699	48	1219	9	229	12⅞	314	1205	547	1243	564

\* Indicates nominal dimensions with NRS gate valves.

\*\* Indicates nominal dimensions with OSY gate valves (full open position).

\*\*\* Indicates weight of complete backflow assemblies with specified gate valves.

The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of the FEBCO air gap with the drain line terminating above a floor drain handles any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a complete failure condition. Do not reduce the size of the drain line from the air gap fitting.

## Performance

The flow capacity chart identifies valve performance based upon rated water velocity up to 20 fps.

- Maximum service flow rate is determined by maximum rated velocity of 7.5 fps.
- AWWA Manual M-22 (Appendix C) recommends that the maximum water velocity in the services be not more than 10 fps.
- UL flow rate is determined by typically rated velocity of 15 ft/sec.
