Connect with *EVEN MORE* Confidence

INTRODUCING THE ALL NEW
Revolutionary Excess Flow Valve Safety Technology

Protect from gas leaks caused by a disconnected or ruptured gas connector

Bidirectional installation with consistent trip rate

Reliable performance up to 350° F

Learn What Real Kitchen Safety Looks Like

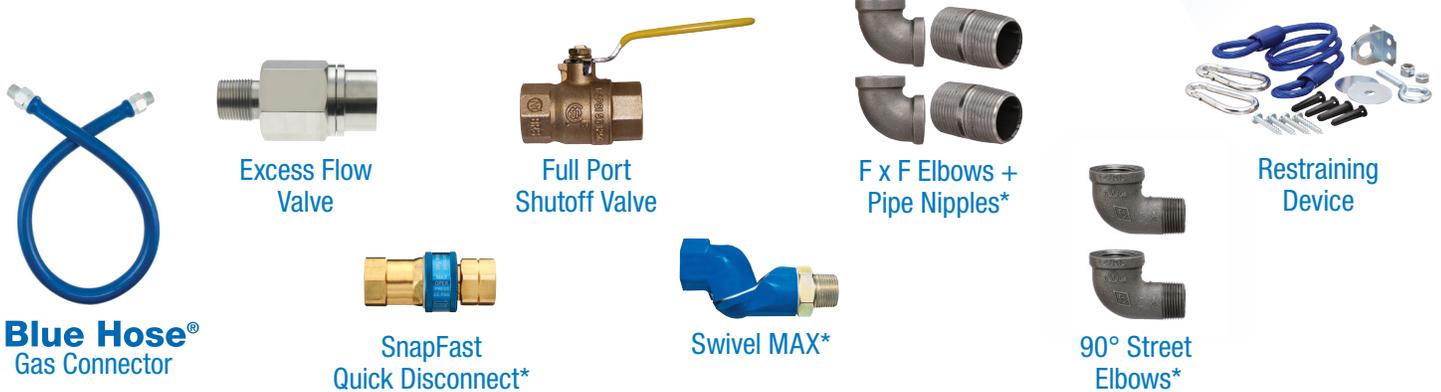

Dormont[®]
A WATTS Brand

Blue Hose®

Gas Connector Kit with EFV

Gas leaks in commercial kitchens are not just inconvenient—they're dangerous, risking fires, explosions, and serious harm to people and property. The Dormont EFV, now standard on select Blue Hose kits, instantly limits gas flow if the connector is disconnected or ruptured, drastically reducing the risk of hazardous leaks.
